

Heavy-Duty Truck Rolling Chassis

This heavy-duty truck chassis features a robust frame designed for commercial vehicle applications. The frame is constructed from high-strength steel, ensuring durability and load-bearing capacity.

Product Overview

Robust Foundation for Commercial Vehicles

This heavy-duty truck rolling chassis provides a high-strength steel frame engineered for maximum durability and load-bearing capacity. Designed as a versatile platform, it comes equipped with a pre-installed engine block and wheel assembly to facilitate rapid body configuration and customization. It serves as an ideal, ready-to-assemble base for various professional commercial vehicle applications.

Technical Specifications

Core Components

- Heavy-duty steel frame
- Engine block
- Wheels

Frame Material	High-strength steel
Assembly Status	Rolling Chassis, Partially Assembled, Commercial Grade
