

Heavy-Duty Vehicle Transmission Jack

This heavy-duty transmission jack is designed for removing, installing, and transporting transmissions, transfer cases, and differentials on vehicles. It features a wide base for stability and smooth-rolling casters for easy maneuverability.

Product Overview

Professional Transmission Support

This heavy-duty transmission jack is engineered for the safe removal, installation, and transport of heavy automotive components including transmissions, transfer cases, and differentials. Built from durable steel, it features a hydraulic lift mechanism for smooth, controlled operation during critical repair tasks. The design prioritizes stability and ease of movement, making it an essential tool for high-volume automotive service environments.

Technical Specifications

Model ID	MG09-01
Construction Material	Durable Steel

Features & Safety

Key Features	Hydraulic Lift, Adjustable Saddle, Overload Protection, Heavy-Duty Build
--------------	--

Operational Details

Maneuverability

- Wide base for enhanced stability
- Smooth-rolling casters
- Adjustable mounting points
