

# Heavy Equipment Cargo Trolley

This three-point loading system is designed for moving heavy loads with stability and precision. It incorporates three independent support points to distribute weight evenly and prevent tipping.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Load Moving Solution

This steerable three-point loading system is engineered for the professional movement of heavy machinery and industrial equipment. Featuring a steerable front section and a pair of adjustable rear dollies, the system provides exceptional stability and precision control. Its low-profile design and high-strength friction pads ensure safe, efficient transport while protecting your facility's flooring.

## Technical Capabilities

### Included Components

- Steerable front section with operate bar
- Pair of adjustable rear trolleys
- Adjustable alignment bar
- High-strength friction pads

### Load Capacity Range

6T Minimum, 36T Standard, Up to 2000T Custom

## Key Advantages

### Performance Metrics

**20 Years**

Years of Engineering Experience

**3 Points**

Support Points

### Safety & Operational Benefits

- Low clearance height for versatility
- Three-point weight distribution
- Friction-padded surface for load stability
- Adjustable rear dolly separation
- Precision directional steering
