Overview

Professional Machinery Moving Solutions

These heavy-duty equipment moving dollies are engineered for the safe and efficient transport of massive loads within industrial environments. Designed for straight-line movement and precise positioning, they feature robust construction suitable for relocating heavy machinery and equipment. With versatile wheel material options, these skates provide a reliable solution for various manufacturing, warehouse, and construction applications.

Technical Specifications

Load Capacity Range

1 ton

Minimum Capacity

2000 ton

Maximum Capacity

Common Applications

- Manufacturing facilities
- Warehouses
- Construction sites
- Heavy machinery relocation

Wheel Material Options

Nylon, Polyurethane, Steel

Product Details

Industry Terminology

Machine Skates • Equipment Dollies • Load Moving Skates • Roller Skids

Customization

Yes
