

Heavy Equipment Moving Rollers

These heavy-duty rollers facilitate the movement of heavy equipment and machinery. Equipped with a swiveling top plate and durable polyurethane wheels, they ensure smooth and efficient transport on various surfaces.

Product Overview

Industrial Load Transport Solutions

These machinery moving rollers are engineered with over two decades of technical research to facilitate the safe and efficient transport of heavy equipment. Featuring a durable steel construction combined with high-grip rubber surfaces, these skates ensure stability and control during complex moving operations. With capabilities scaling up to 1000 tons per set, our roller dollies provide a reliable, industrial-grade solution for various professional rigging and transport requirements.

Technical Specifications

Maximum Load Capacity

1000 tons

Capacity per set

Available Skate Types

- Roller Skids
- Crawler Type Roller Dollies
- Steerable Machinery Skates
- Rotating Moving Dollies

Design Features

Steel Construction, Rubber Grip Surface, Integrated Handle, Swiveling Top Plate, Polyurethane Wheels
