

Heavy Equipment Roller Skids

Equipment roller kits are designed for use in challenging environments, providing complete control when moving heavy items. These moving rollers ensure the smooth relocation of heavy machinery.

Product Overview

Industrial Heavy-Duty Roller Skids

These professional-grade roller skids are designed for moving heavy machinery and equipment in demanding industrial environments. They offer exceptional control and ease of handling, ensuring efficient loading and unloading operations. With a non-marking design, these dollies protect warehouse and factory floors from damage while providing a stable, high-capacity transport solution.

Technical Capabilities

Maximum Load Capacity

20 tons

Max Capacity

2 tons

Min Capacity

Floor Protection

Yes

Operational Features

Movement Characteristics

- Smooth roller action
- Precise steering
- Non-marking operation
- Multi-function handling

Ideal Applications

Industrial, Construction, Narrow Spaces, Loading/Unloading
