

Heavy Flatbed Truck for Oversized Loads

This heavy flat truck is designed for transporting extremely heavy and oversized loads. Its flatbed configuration allows versatile loading and unloading for construction, manufacturing, and infrastructure development.

Overview

Heavy-Duty Transport Solution

The WTW150B heavy flatbed truck is engineered for the safe transport of extremely oversized and heavy industrial loads. With an impressive rated load capacity of 156,000 kg, this vehicle utilizes a high-stability multi-axle design to distribute weight effectively. It is an essential asset for large-scale infrastructure projects, manufacturing logistics, and heavy construction equipment transport.

Technical Specifications

Rated Load Capacity

156000 kg
Rated Load

Platform Dimensions	12 x 5.1 meters
Minimum Platform Height	1600 mm
Unladen Weight	36000 kg

Mechanical Systems

Axis Number	3 / 6
Steering Wheel Frames	32
Tire Specifications	12.00R15

Performance

Speed (No-load)	12-15 KM/h
Speed (Reloaded)	6-8 KM/h
Reload Gradeability	6% - 8%
