Overview

Heavy Lift Cargo Solutions

This heavy lift cargo vessel is engineered for the efficient transport of unpackaged bulk cargo, including grains, coal, ore, and cement. Designed with high-capacity, box-shaped holds, the vessel maximizes cargo volume while ensuring stability during transit. Equipped with specialized self-loading and unloading cranes, this carrier is ideal for operations in ports with limited infrastructure, offering superior flexibility and operational independence.

Vessel Capabilities

Cargo Handling Equipment

- Integrated heavy-duty cranes
- Self-loading capability
- Self-unloading capability
- Optimized for bulk materials

Hull Specifications

Anti-fouling coating, High-capacity holds, Box-shaped cargo holds

Operational Metrics

Key Operational Metrics

1 Open Water

Transit Capability

1 High

Port Independence
