

Heavy Load Corrugated Paper Box with Angle Supports

This angle type heavy load on corrugated paper box is designed with internal angle supports for enhanced structural integrity. It is ideal for packaging and shipping fragile or heavy items, providing superior protection against impact and compression.

Product Overview

Heavy-Duty Packaging Solution

This specialized corrugated paper box is engineered for transporting heavy loads with maximum security. Featuring integrated internal angle supports, the design provides superior structural integrity and resistance against compression and impact during transit. It serves as a sustainable, cost-effective alternative to traditional packaging, ensuring your goods remain stable and protected.

Technical Specifications

Load Capacity

Heavy Load

Key Features

- Internal angle supports
- Enhanced structural integrity
- Impact protection
- Compression resistance
- Sustainable material

Material

Durable corrugated cardboard

Application

Suitable For

Industrial Applications, Commercial Shipping, Fragile Items, Heavy Goods
