## Product Overview

### Heavy Machinery Ground Engaging Tools

These ground engaging tools are precision-engineered for heavy construction and mining machinery, providing superior performance and durability in demanding industrial applications. The range includes essential components such as cutting edges, bucket teeth, adapters, and undercarriage parts designed to meet or exceed OEM specifications. Each component is manufactured using high-quality raw materials to ensure an optimal fit, reduced downtime, and extended service life for your equipment.

## Product Range

### Components Offered

- Cutting edges
- End bits
- Bucket teeth
- Ripper teeth & protection
- Adapters
- Pins & retainers
- Bolts & nuts
- Chocky bars
- Grouser bars
- Undercarriage parts

## Quality & Compliance

Certifications	ISO 9001:2008, SGS
Warranty Period	1 year

## Customization & Support

### Customization

- OEM part number matching
- Customized size manufacturing
- Technical support provided
