

Heavy Machinery Moving Dolly with Rotating Top

This heavy machinery moving dolly is designed for transporting heavy loads with ease. It features a robust construction with multiple rollers for smooth movement and a rotating top plate for flexible positioning.

Product Overview

Professional Machinery Transport Solution

This heavy machinery moving dolly is engineered for the safe and efficient transport of massive industrial loads. Equipped with a rotating top plate, it allows for flexible positioning in tight spaces while ensuring stability during relocation. These dollies are ideal for professional rigging operations in sectors such as power generation and aerospace manufacturing.

Technical Specifications

Design Features

Rotating Top • Heavy Duty • Stable Distribution

Wheel Material	Nylon
Key Wheel Advantages	Non-floor damaging, Smooth rolling, High durability

Application Areas

Suitable Industries

- Power Plants
- Aerospace
- Industrial Rigging
- Heavy Equipment Relocation
