

# Heavy Machinery Moving Skates

These machinery movers offer a capacity from 3 tons to 100 tons. They are capable of moving almost any equipment required for relocation or installation.

## Overview

### Industrial Machinery Moving Skates

These heavy-duty machinery moving skates are designed for professional factory relocation and industrial equipment transport. They replace traditional rollers, allowing for safer, easier, and more precise movement of heavy loads in constrained spaces. With over 20 years of manufacturing expertise, these skates are engineered for high-performance safety, quality, and versatility.

## Performance Metrics

### Load Capacity

**3 tons**

Minimum Capacity

**100 tons**

Maximum Capacity

## Technical Specifications

### Wheel Material Options

- Nylon wheels
- Steel wheels
- Polyurethane (PU) wheels

### Material Characteristics

Wheel Type	Primary Advantage
Polyurethane (PU)	Protects cement floors; leaves no marks
Steel	Enhanced strength and durability

## Certifications & Quality
