

Heavy Machinery Skates for Load Moving

These load skates have a low height profile. This low profile allows for easy placement of heavy machinery onto the skates.

Overview

Professional Load Moving Solution

These heavy-duty machinery skates are engineered to facilitate the effortless relocation of industrial equipment of various sizes and shapes. Designed for high-capacity performance, they ensure safe and efficient movement across diverse professional environments. A key feature of their design is the non-marking roller system, which protects flooring surfaces while maintaining long-lasting durability and operational safety.

Performance & Capacity

Load Capacity

1 Heavy Duty
High Capacity Handling

Floor Protection

Yes

Suitable Applications

Industrial Machinery, Heavy Equipment Relocation, Construction Sites

Design Features

Roller Configuration

- Multiple roller design for smooth movement
- Non-marking material
- Versatile load balancing
