

Heavy Machinery Track Shoes

These track shoes are made for heavy machinery. They are manufactured from modified medium carbon steel, induction hardened, die quenched, and tempered for durability.

Product Overview

Professional Grade Heavy Machinery Track Shoes

These heavy-duty track shoes are engineered for maximum durability and performance in demanding environments. Manufactured from modified medium carbon steel, each unit undergoes rigorous induction hardening, die quenching, and tempering processes to ensure structural integrity. Designed with curved leading and trailing edges, they offer superior movement and longevity across a wide array of industrial machinery.

Technical Specifications

Design Features

- Curved leading edge
- Curved trailing edge

Material Composition	Modified medium carbon steel
Manufacturing Standards	Induction Hardened, Die Quenched, Tempered

Compatibility

Compatible Machine Brands

Caterpillar • Komatsu • Hitachi • Volvo • Kobelco • Sumitomo • Doosan • Hyundai • Mitsubishi
