

# Helical Flute End Mill

High-speed steel end mills have helical flutes for efficient material removal. They are suitable for machining various materials, including ferrous and non-ferrous metals, plastics, and composites.

## Product Overview

### High-Performance Helical Flute End Mill

These high-speed steel end mills feature precision-engineered helical flutes designed for efficient material removal across diverse milling applications. Engineered for versatility, they are suitable for machining a wide range of materials including ferrous and non-ferrous metals, as well as plastics and composites. Each tool is built to deliver excellent surface finish quality and superior dimensional accuracy for demanding machining tasks.

## Technical Specifications

### Design Features

- Helical flute geometry
- High-speed steel construction
- Optimized for material removal

### Performance Highlights

**1 Excellent**

Surface Finish Quality

**1 High**

Dimensional Accuracy

### Material Composition

High-Speed Steel (HSS)

### Compatible Materials

Ferrous Metals, Non-Ferrous Metals, Plastics, Composites
