

Helical Flute Milling Cutter

This high-performance cutting tool is designed for precision machining operations. Its cylindrical body features multiple helical flutes, optimized for efficient material removal and superior surface finish.

Overview

Precision Helical Flute Milling Cutter

This high-performance milling cutter is engineered for precision machining operations, featuring a robust cylindrical body with optimized helical flutes. Designed for efficient material removal and superior surface finishing, this tool ensures consistent performance across demanding industrial environments. Constructed from high-speed steel or carbide, it offers exceptional durability and wear resistance, making it a versatile choice for machining steel, aluminum, and various plastics.

Technical Specifications

Compatible Materials

- Steel
- Aluminum
- Plastics

Material Options

High-Speed Steel (HSS), Carbide

Design Features

Flute Geometry

Helical

Shank Compatibility

Standard machine tool shank
