

Helical Gear Speed Reducer

This high-precision helical gear reducer is designed for industrial use. It offers a compact size, high load capacity, and ease of installation for diverse applications.

Product Overview

FR Series Precision Helical Gear Reducer

The FR series in-line helical gear reducer is engineered for high-precision industrial applications. Designed with advanced technical standards, this unit offers a compact footprint without compromising on performance. It delivers exceptional carrying capacity and versatility, making it a reliable solution for various power transmission requirements in modern machinery.
