

Helical Gearbox for Industrial Machinery

This helical gearbox is designed for demanding industrial applications. It provides reliable and efficient power transmission for machinery such as conveyors, mixers, and pumps.

Product Overview

High-Performance Prestage Helical Gearbox

This high-performance helical gearbox is designed for demanding industrial applications requiring precision power transmission. Engineered for reliability, it features robust construction and optimized lubrication to ensure smooth operation in heavy-duty machinery. It serves as an ideal solution for integration with various systems including conveyors, mixers, and pumps.

Technical Specifications

Gear Ratio	3 ratio
------------	---------

Compatibility

Compatible IEC Flanges	63B5, 71B5, 80B5, 90B5
NEMA Flange Compatibility	56C

Performance Metrics

Key Operational Benefits

- Optimized lubrication for extended lifespan
- Precision-engineered gear teeth
- Low maintenance requirements
- Smooth power transmission
