

Helical Gearmotor

This helical gearmotor provides high torque and precise speed control. Its modular design allows for easy customization and maintenance.

Overview

High-Performance Helical Gearmotor

The Helical Gearmotor series represents a robust and efficient power transmission solution designed for diverse industrial applications. These units combine a high-quality helical gearbox with an electric motor to deliver exceptional torque and precise speed control. With a modular design that facilitates easy customization and maintenance, this series is engineered to provide reliable, consistent performance in demanding operating environments.

Technical Specifications

Model Range	17 - 187
Gear Ratio Range	3.37 - 289.74

Performance Metrics

Input Power Range

0.12 kW
Min Power

250 kW
Max Power

Output Torque Range

2.4 N.m
Min Torque

56494 N.m
Max Torque
