

Helideck Safety Net

Helideck safety nets surround helicopter landing platforms, providing a critical barrier. They prevent personnel and equipment from falling off the edges.

Product Overview

Helideck Safety Net

These helideck nets are essential safety barriers designed to surround helicopter landing platforms, effectively preventing personnel and equipment from falling off the edges. Constructed from high-strength synthetic fibers like nylon or polyester, they offer superior resistance to abrasion, UV degradation, and harsh chemical exposure. The mesh design is engineered to balance containment requirements with minimal interference to airflow, ensuring safety and performance in offshore environments.

Product Details

Material Features

- High-strength synthetic fibers
- Nylon construction
- Polyester construction
- UV degradation resistant
- Abrasion resistant
- Chemical exposure resistant

Product Variations

Antiskid Helicopter Landing Deck Net, Helideck Landing Net, Heli Deck Surround Nets, Cargo Nets, Safety Nets, Ship Deck Safety Net

Compliance & Maintenance

Compliance

Aviation Authority Compliant • Offshore Industry Standard

Maintenance Requirement

Regular inspection and maintenance are essential to ensure the continued integrity and effectiveness of the net.
