Product Overview

High-volume hemp seed hulling machine designed for commercial oil extraction and food production.

High-Efficiency Hemp Seed Shelling

This industrial-grade shelling machine is designed for high-volume hemp seed hulling, featuring a multi-stage process that includes cleaning, shelling, and separation. It is engineered to ensure high-quality output with minimal seed damage, making it an ideal solution for oil extraction and food production businesses. The equipment is versatile and can be adapted for processing both hemp and sunflower seeds with specific component adjustments.

Performance Metrics

Seed Crushing Rate

10 %

Maximum Crushing Rate

Operational Requirements

Optimal Water Content

10-12%

Technical Features

Processing Stages

- Seed Cleaning
- Shelling/Hulling
- Seed-Kernel Separation
- Integrated Dust Collection

Adjustable Settings

Seed Size Adjustment, Shelling Intensity Control, Interchangeable Sieve Tablets

Versatility

Compatible Seed Types

Hemp Seeds • Sunflower Seeds

Hemp Processing Conversion

- Change inside sieve tablets
- Transform sorting screening machine
- Replace fish scale tablets with stacked sieve tablets

Service & Support

Warranty Period

1 Year
