

# HEPA Air Purifier with Humidifier and Aroma Diffuser

This air purifier combines air purification and humidification in one device. It removes pollutants with a HEPA filter while adding moisture to prevent dryness.

## ADDITIONAL IMAGES

## Overview

### Advanced Air Purification and Humidification

This versatile 3-in-1 device combines high-efficiency air purification, humidification, and aroma diffusion to significantly improve indoor air quality. Designed for spaces between 14-30 square meters, it utilizes a multi-stage filtration system, including a HEPA filter, to remove allergens, pollutants, and odors while maintaining optimal moisture levels. With quiet operation and intelligent sensor technology, it provides a seamless solution for creating a healthier, more comfortable living or working environment.

## Performance

### CADR

**200 m³/h**

Clean Air Delivery Rate

|                          |          |
|--------------------------|----------|
| Noise Level              | 21.6 dB  |
| Recommended Area         | 14-30 m² |
| PM2.5 Removal Efficiency | 99.9%    |

## Filtration System

### Filtration Stages

- Cold Catalyst Filter
- Antibacterial Filter
- Honeycomb Activated Carbon Filter
- High Efficiency HEPA Filter

|                       |   |
|-----------------------|---|
| Sterilization Methods | 365nm Ultraviolet Light, Anion Purification |
|-----------------------|---|

## Technical Specs

|                  |                    |
|------------------|--------------------|
| Model            | OLS-K02B           |
| Power            | 65 W               |
| Dimensions       | 360 x 195 x 565 mm |
| Net Weight       | 6.5 KG             |
| Chassis Material | ABS                |

## Features

Quality and compliance certifications including CE, CB, and ISO 9001.

### Certifications

CE • CB • ROHS • ERP • ISO 9001

### Safety Features

Dumping Switch

### Control Options

Panel Buttons, Remote Control
