Product Overview

Hermetically Sealed Air Conditioner Compressor

This high-reliability hermetically sealed compressor is engineered for both commercial and residential air conditioning applications. It features an advanced internal oil circulation structure and gas injection technique to ensure optimal performance. Designed for durability and energy efficiency, this unit includes a concentrated motor and highly reliable bearings to support long-term operational stability.

Technical Features

Suitable Applications

- Commercial Air Conditioning
- Residential Air Conditioning

Key Advantages

Highly-reliable bearings, Internal oil circulation, Concentrated Motor, Gas injection technique

Design & Construction

Design Highlights

Hermetically Sealed • Robust Shell Construction • Optimized Refrigerant Flow
