

Hermetically Sealed Compressor for Heat Pumps

This hermetically sealed compressor is designed for air source heat pump systems. Its robust construction ensures reliable performance and an extended lifespan.

Product Overview

High-Efficiency Hermetic Compressor

This hermetically sealed compressor is specifically engineered for air source heat pump systems, offering robust construction for reliable performance and an extended operational lifespan. It features a permanent magnet motor and high-speed capabilities to provide optimal heating and cooling capacity while minimizing overall energy consumption. Designed for versatility, it is suitable for a wide range of refrigerants and diverse operating conditions, ensuring consistent and quiet operation.

Technical Features

Key Performance Indicators

1 Enabled

High Speed Performance

1 Included

Reliable Bearings

Design Attributes

Hermetically Sealed • Robust Construction • Energy Efficient • Quiet Operation

Motor Technology

Permanent magnet motor

Application

Primary Application

Heat Pump, Air Source Systems
