

Hermetically Sealed Reciprocating Compressor

This hermetically sealed compressor is designed for refrigeration applications. It operates on 110-115V at 50Hz and uses R134a refrigerant, featuring thermal overload protection.

Overview

High-Efficiency Hermetic Compressor

This hermetically sealed reciprocating compressor is engineered for reliable performance in refrigeration applications. Utilizing R134a refrigerant, it offers stable cooling capacity suitable for light commercial and residential cooling systems. The unit features built-in thermal protection to ensure operational safety and longevity under demanding conditions.

Technical Specifications

Model Number	QD110H11G
Cooling Capacity	300 W
Refrigerant	R134a

Electrical Data

Voltage / Frequency	110V / 60Hz
Thermal Protection	Yes

Certifications

Compliance Certifications	CCC, CB, CE, ROHS
