Product Overview

Professional Grade Sleeve Anchors

These heavy-duty sleeve anchors are engineered for reliable, high-strength fastening in concrete, brick, and block substrates. Featuring a hex flange head design, they allow for secure tightening and a permanent, vibration-resistant hold. The pre-assembled design streamlines installation, making them ideal for mounting machinery, structural components, and heavy-duty fixtures.

Technical Specifications

Key Features

- Pre-assembled for easy installation
- Hex flange head for high torque application
- Expansion-style holding mechanism
- Corrosion-resistant coating

Common Applications

- Machinery mounting
- Structural component fastening
- General fixtures

Anchor Type

Hex Flange Head Sleeve Anchor

Suitable Substrates

Concrete, Brick, Block
