

Hex Head Bolt

This is a high strength, high tensile bolt. It is corrosion resistant.

Overview

Industrial Hex Head Bolt

These high-strength hex head bolts are engineered for reliable fastening in structural and industrial applications. Featuring a hexagonal head design for efficient wrenching and a threaded shaft, they provide secure assembly across a variety of construction projects. Available in multiple grades and finishes, these bolts are designed to meet rigorous DIN standards for consistent performance.

Technical Specifications

Standards

- DIN 9833
- DIN 931

Material

Carbon Steel

Available Grades

4.8, 8.8, 10.9, 12.9

Size Range

M6 - M42

Finishing

Surface Finish

HDG • Plain • Zinc

Logistics & Packaging

Packaging

Carton (Bulk 25kg) + Pallet
