

# Hexagonal Steel Wrecking Bar Set

This set includes multiple hexagonal wrecking bars for demolition and prying applications. Constructed from high-strength steel, the bars feature chisel, pointed, and curved ends.

## Product Overview

### Professional Wrecking Bar Set

This hexagonal wrecking bar set is engineered for demanding demolition and prying tasks. Constructed from high-strength 65Mn steel, each bar undergoes drop forging and heat treatment on both sides to ensure maximum durability and resistance to bending. The hexagonal profile not only enhances grip during operation but also prevents the tools from rolling on uneven surfaces.

## Technical Specifications

Material	65Mn Steel
Length	400 mm
Diameter	18 mm

## Construction & Finish

### Finish

Powder Coating • Black

### Key Design Features

- Hexagonal profile for anti-roll stability
- Heat treatment on both ends
- High-strength steel construction

Manufacturing Process	Drop Forged, Heat Treated
