

HID Xenon Headlight Bulb

This high-intensity discharge (HID) xenon headlight bulb is designed for automotive lighting. It features a quartz glass tube containing xenon gas and metal halide salts, providing brighter and more efficient illumination compared to halogen bulbs.

Product Overview

High-Performance HID Xenon Lighting

This High-Intensity Discharge (HID) xenon headlight bulb is engineered for superior automotive illumination. Utilizing a quartz glass tube filled with xenon gas and metal halide salts, it offers significantly brighter and more efficient light output compared to standard halogen alternatives. Designed as a reliable replacement for existing HID lighting systems, it ensures optimal visibility and safety on the road.

Technical Specifications

Lighting Technology	High-Intensity Discharge (HID) Xenon
Construction Materials	Quartz Glass, Xenon Gas, Metal Halide Salts
Connection Interface	Multi-pin connector

Application & Compatibility

Usage Context

Replacement Part • HID System Compatible

Primary Application	Automotive Lighting
