

Hideaway LED Light Fixture for Emergency and Security

LED exterior lighting available with amber, red, and blue lens options. This 1W LED fixture measures 260mm x 125mm x 70mm.

Product Overview

Compact Emergency Lighting Solution

The LTD270 is a compact and versatile hideaway LED lighting fixture specifically engineered for emergency and security applications. Its robust construction ensures reliable performance across diverse environments, while the high-intensity LED array delivers powerful illumination with minimal power consumption. Designed for discreet installation, the small form factor makes it an ideal choice for vehicles, buildings, and other locations requiring reliable supplemental lighting.

Technical Specifications

Performance Highlights

- High-intensity LED array
- Low power consumption
- Robust, durable construction
- Compact, discreet form factor

Installation Suitability

Tight Spaces • Vehicle Integration • Structural Mounting

Primary Applications

Emergency Services, Security Systems, Vehicle Lighting, Building Security
