

High-Capacity Air Compressor with Horizontal Tank

This high-capacity air compressor features a large horizontal tank and dual pump units for increased airflow. Equipped with multiple outlets and a pressure control system, it is mounted on wheels for easy portability and robust construction.

Overview

Industrial Performance

This high-capacity air compressor is designed for demanding professional environments, featuring a robust horizontal tank configuration for consistent output. Equipped with dual pump units, it ensures superior airflow efficiency for a wide range of industrial tasks. The inclusion of integrated pressure controls and mobility features makes it an ideal solution for spray painting and operating pneumatic tools.

Technical Specifications

Design Type	Horizontal Tank with Dual Pump Units
Portability	Yes

Performance Metrics

Utility Features

- Multiple Outlets
- Advanced Pressure Control System
- Mounted on Wheels
- Robust Construction

Primary Applications	Spray Painting, Pneumatic Tools, Industrial Use
