

High Capacity Jaw Crusher for Mining and Quarry

This high-capacity jaw crusher is designed for mining and quarry applications. It features a robust construction for efficient and reliable crushing of various materials.

ADDITIONAL IMAGES

Product Overview

High-Efficiency Crushing Technology

This high-capacity jaw crusher features an advanced hydraulic design, allowing for seamless adjustments and streamlined operation. Engineered to integrate modern science with practical mining needs, it provides a robust solution for primary crushing. The machine is optimized for productivity, minimizing downtime while delivering consistent output for various demanding industrial environments.

Technical Features

Automation	Automatic Hydraulic
Compatible Materials	Granite, Marble, Basalt, Limestone, Quartz, Pebble, Copper Ore, Iron Ore

Operational Highlights

Performance Advantages

- Optimized crushing chamber design
- Heavy-duty construction for durability
- Enhanced maintenance access
- High throughput for maximum productivity
