

High-Capacity Lead-Acid Battery

This is a high-capacity lead-acid battery designed for reliable power storage. The battery features a robust construction with multiple cells and secure terminals.

Overview

High-Capacity Power Storage Solution

This high-capacity lead-acid battery is engineered for reliable, long-term energy storage in demanding environments. Featuring a robust construction with multiple cells and secure, heavy-duty terminals, it ensures consistent performance and safety. It is an ideal choice for various industrial and commercial applications that require a dependable and steady power supply.

Technical Specifications

Battery Technology

Lead-Acid • High-Capacity

Construction Features

- Multi-cell design
- Robust outer casing
- Secure terminal connections

Model Number

6-QA-200
