

High-Capacity Lithium Battery for RVs

This high-capacity lithium battery is designed for RV applications. It provides reliable power for various RV appliances and electronics, ensuring extended off-grid capabilities.

Product Overview

High-Performance RV Power Solution

This 12V 200Ah lithium iron phosphate battery is engineered for reliable off-grid power in small saloon cars and RVs. It supports high-power 2500W inverters, allowing you to run essential household appliances like induction cookers and kettles while on the move. With integrated vehicle-mounted and external charging capabilities, it provides a flexible and robust energy source for your mobile adventures.

Technical Specifications

Voltage	12 V
Capacity	200 Ah
Cell Chemistry	Lithium Iron Phosphate

Performance Metrics

Key Performance Metrics

50 A

Charging Current

200 A

Discharge Current

Mechanical & Design

Shell Material	Cold rolled plate with plastic spray
