

High-Capacity Rechargeable Ni-MH Battery

This rechargeable Ni-MH battery features a 5000mAh capacity and 1.2V voltage. It is suitable for high-drain devices requiring a reliable and long-lasting power source.

Product Overview

High-Capacity Power Solution

This high-performance rechargeable Ni-MH battery is engineered for demanding applications that require consistent, long-lasting power. With a robust 5000mAh capacity and a 1.2V output, it is specifically designed to support high-drain devices reliably. Its rechargeable nature offers a cost-effective and sustainable power solution for professional equipment.

Technical Specifications

Battery Chemistry	Ni-MH (Nickel-Metal Hydride)
Capacity	5000 mAh
Voltage	1.2 V

Charging Information

Standard Charging

18 hours
Charge Time

280 mA
Charge Current

Features

Key Features	Rechargeable, High-Drain Compatible, Long-Lasting
