

High-Carbon Steel Axe Head

This axe head is made from high-carbon steel and designed for heavy-duty splitting and chopping. It features a hardened cutting edge for enhanced durability.

Product Overview

Professional Grade Axe Head

This high-carbon steel axe head is engineered for heavy-duty splitting and chopping applications, specifically designed for the South American market. It features a precision-forged construction that ensures optimal grain alignment and superior strength. The blade is fully ground and finely polished, offering a durable cutting edge that maintains performance under rigorous use.
