

High-Carbon Steel Blade Pruning Shears

These pruning shears are designed for efficient and precise cutting. They feature high-carbon steel blades and ergonomic handles.

Product Overview

Professional Pruning Shears

These high-carbon steel pruning shears are engineered for precision and durability in agricultural and gardening environments. The blades undergo rigorous heat treatment to maintain a sharp, lasting edge suitable for frequent use. Designed with a user-focused approach, the tools combine industrial-grade cutting performance with ergonomic features for efficient plant maintenance.

Technical Specifications

Blade Material	High-Carbon Steel
Blade Hardness	59 HRC
Hardness Range	HRC 58-60

Build & Design

Handle Construction	Metal with dipped plastic coating
Features	Heat Treated, Durable, Sharp
