

High-Carbon Steel Board Saw

This board saw features a high-carbon steel blade, ensuring durability and precision in cutting tasks. Designed with a reinforced back, it minimizes blade flex to provide straight, accurate cuts on boards and panels.

Overview

Professional Grade Board Saw

This rigid board saw is engineered for precision and durability, featuring a high-carbon steel blade that ensures long-lasting performance. Designed with a reinforced back to minimize blade flex, it guarantees straight, accurate cuts every time. The ergonomic handle is crafted to provide a comfortable and secure grip, effectively reducing user fatigue during extended cutting tasks.

Technical Specifications

Primary Applications

- Cutting boards
- Panel cutting
- Precision woodworking

Blade Material	High-Carbon Steel
Design Features	Reinforced Back, Ergonomic Handle, Anti-Flex Design
