

High Carbon Steel Digging Shovel

This shovel features a high carbon steel blade, providing superior strength and durability for efficient digging. It is equipped with a smooth, wooden handle that ensures a comfortable grip and reduces user fatigue during prolonged use.

Product Overview

Professional Grade Digging Shovel

This heavy-duty digging shovel is engineered with a high carbon steel blade, ensuring superior strength and long-lasting durability for demanding tasks. Designed for both professionals and enthusiasts, it features a smooth, ergonomic wooden handle to minimize fatigue during extended use. Whether for large-scale construction, landscaping, or garden maintenance, this tool provides the reliability required for efficient material handling.

Technical Specifications

Blade Material	High Carbon Steel
Handle Material	Wood

Application & Usage

Primary Applications	Gardening, Construction, Landscaping, Digging
----------------------	---

Key Features

Design Benefits

- High carbon steel for superior strength
- Ergonomic handle for reduced fatigue
- Heavy-duty construction for durability
- Efficient material handling design
