

High-Cut PVC Protective Boots

These high-cut PVC boots are suitable for industrial and agricultural applications. Constructed from durable PVC, they offer resistance to water, chemicals, and abrasions, while the cleated outsole provides superior grip.

Product Overview

Industrial-Grade PVC Protection

These high-cut protective boots are engineered for demanding industrial and agricultural environments where moisture and chemical exposure are constant. Built from resilient PVC, the design prioritizes durability and user safety with a reinforced construction at critical stress points. The specialized cleated outsole provides reliable traction on difficult terrain, making these an essential choice for muddy or wet worksites.

Material and Design

Construction Material	PVC
Design Features	High-cut, Ribbed upper, Reinforced toe, Reinforced heel

Performance and Safety

Environmental Resistance

- Water resistant
- Chemical resistant
- Abrasion resistant

Outsole Performance	Cleated yellow PVC outsole for superior traction
---------------------	--

Application

Suitable Environments

Industrial • Agricultural • Wet conditions • Muddy conditions • Chemically exposed areas
