

High-Cut Waterproof Safety Boots

High-cut safety boots provide robust protection for demanding work environments. Constructed from durable, waterproof material, these boots feature a reinforced toe cap and slip-resistant sole.

Product Overview

Professional Protection

These high-cut safety boots are engineered for industrial environments where protection and reliability are paramount. Certified to international safety standards, they feature robust steel reinforcement and a 100% waterproof construction. Designed for comfort and durability, they offer superior resistance against oils, acids, and alkalis, making them ideal for demanding applications in construction and agriculture.

Compliance and Standards

Certifications

CE Approved, EN 20345-S5, EN ISO 20345

Technical Specifications

Safety Features

- Steel toe cap
- Steel midsole
- Reflective stripe
- Comfortable sole

Material

PVC

Resistance Properties

Resistance

Oil Resistant • Acid Resistant • Alkali Resistant • 100% Waterproof
