

High-Density Fiber Optic Patch Panel

This optical fiber distribution frame is made with high-quality cold-rolled steel. Its modular design allows for front fiber output and rear cable management.

Overview

High-Density Fiber Optic Connectivity

This high-density fiber optic patch panel is engineered for efficient cable management in demanding data center and telecommunications environments. Featuring a robust, modular design, it supports seamless installation and maintenance for various connector types. The unit is constructed from high-quality cold-rolled steel, ensuring long-term durability and reliable performance in indoor settings.

Standards & Compliance

Reference Standard	ISO/IEC 11801
--------------------	---------------

Physical Dimensions

Available Rack Heights

- 1U
- 2U

Dimensions (H x W x D)

Rack Unit	Dimensions (mm)
1U	1U x 482 x 385
2U	2U x 482 x 385

Installation Width	19 inch
--------------------	---------

Material & Finish

Surface Color

Black

Material	Cold rolled steel plate
----------	-------------------------

Environmental Conditions

Operating Temperature

-10 °C

Min Operating Temp

60 °C

Max Operating Temp

Storage Temperature

-40 °C

Min Storage Temp

68 °C

Max Storage Temp

Relative Humidity

10% ~ 90%
