

# High-Density Networking Cabinet

This networking cabinet features a simple structure, exquisite design, and precise dimensions. The flat pack structure is around 1/3–1/2 of the original assembled volume.

## Product Overview

### High-Density Networking Cabinet

This high-density networking cabinet is designed for optimal cable management and equipment security in data centers and server rooms. Constructed from durable SPCC cold-rolled steel, the cabinet features a sturdy frame with adjustable mounting rails. Its design provides multiple access points, ensuring easy installation and maintenance for professional network environments.

## Technical Specifications

### Static Loading Capacity

**300 KG**  
Static Load

### Degree of Protection

IP20

### Compliance Standards

ANSI/EIA RS-310-D, IEC297-2, DIN41494-1, DIN41494-7, ETSI

## Material and Finish

### Surface Finish Process

- Degreasing
- Pickling
- Phosphoric
- Powder coated

### Primary Material

SPCC cold rolled steel

## Model Configurations

### Available Models and Dimensions
