

High-Efficiency Evaporative Air Cooler

High-efficiency draught fan designed for optimal air circulation and cooling. Features a robust construction with durable plastic housing, integrated control panel with digital display, and adjustable louvers for directional airflow.

Product Overview

High-Efficiency Cooling Solution

This high-efficiency evaporative air cooler is designed for optimal air circulation and cooling across industrial, commercial, and residential environments. Featuring a robust plastic housing and a large-capacity water tank, it provides reliable performance for demanding cooling needs. The unit is equipped with caster wheels for easy mobility and adjustable louvers to ensure precise directional airflow where it is needed most.

Product Category

High-Efficiency • Draught Fan • Evaporative Cooler

Key Performance Metrics

Performance Highlights

3000

Series Model

Design & Construction

Housing Material	Durable plastic
Mobility	Caster Wheels, Portable Design

Control & Operation

Control Panel	Integrated digital display
Airflow Adjustment	Adjustable louvers for directional airflow

Cooling System

Cooling Method	Evaporative cooling
Water Tank	Large-capacity integrated tank

Applications

Target Applications

- Industrial facilities
- Commercial spaces
- Residential areas
