

# High-Efficiency Hot Water Boiler

This boiler is a high-efficiency heating solution designed for modern homes, providing reliable hot water and space heating. Its advanced combustion technology ensures optimal performance, while intelligent safety features offer long-lasting operation.

## Product Overview

### High-Efficiency Heating Solution

The C12W boiler is a high-efficiency heating solution designed for modern requirements. This compact and sleek unit provides reliable hot water and space heating, featuring a user-friendly digital interface for precise temperature control and energy management. Its advanced combustion technology ensures optimal performance and reduced emissions, offering long-lasting operation and peace of mind.

## Technical Specifications

Dimensions (H x W x D)	1740 x 420 x 330 mm
Model Identifier	C12W

## Features

### Control Interface

Touch Screen • Dynamic Display

### Safety & Monitoring

- Dynamic display for safe operation
- Water Pressure Reminder

## Options

Capacity Selection	Yes
