

High-Efficiency Solar Module

This high-performance solar module is designed for efficient energy conversion. It features a robust construction and high-quality solar cells for optimal power output.

Product Overview

High-Efficiency Solar Module

This high-performance solar module is engineered for superior energy conversion across residential, commercial, and industrial applications. Built with robust construction and advanced cell technology, it provides a reliable and sustainable power output. The unit is designed for versatility, performing exceptionally well in both grid-tied and off-grid solar energy systems.

Technical Specifications

Model Identifier	RT-100P
Design Standard	German Engineering
Suitable Applications	Residential, Commercial, Industrial, Grid-tied, Off-grid

Performance Highlights

Key Performance Indicators

100 W
Power Output
