

High-Efficiency Solar Panel Module

This high-efficiency solar panel is designed for converting sunlight into electricity. It features a robust frame for durability and ease of installation, equipped with standard connectors for seamless integration into solar power systems.

Overview

High-Efficiency Solar Module Overview

This high-efficiency solar panel module is engineered for optimal energy conversion across residential, commercial, and industrial applications. Built with 60 high-performance 156.75x156.75mm 5-busbar monocrystalline cells, the module ensures robust power generation. It is designed for longevity and environmental resilience, featuring anti-PID technology and a positive power tolerance.

Technical Specifications

Cell Technology	Monocrystalline
Number of Cells	60
Cell Dimensions	156.75 x 156.75 mm
Busbar Configuration	5 Busbar

Performance & Quality

Performance Milestones

90 % after 12 years

Power Output Warranty

80 % after 25 years

Power Output Warranty

Certifications	TUV
Quality Warranty	12 years
