

High Efficiency Surface Blasting Machine

This high-efficiency blast machine is designed for robust and precise surface preparation. The central blasting unit ensures optimal abrasive delivery, resulting in superior cleaning and surface profiling.

Overview

High-Efficiency Surface Blasting Solution

This high-efficiency blast machine is engineered for robust and precise surface preparation in demanding industrial environments. Featuring a durable, cage-like frame with adjustable supports, the system ensures exceptional stability and adaptability to various pipe diameters. The central blasting unit is precision-engineered for optimal abrasive delivery, consistently providing superior cleaning and surface profiling results.

Key Features

Design Attributes

Robust Construction, Adjustable Supports, High-Precision Blasting, Industrial Grade
