

High Efficiency Three Phase Induction Motor

The high efficiency three phase induction motor is designed for industrial applications requiring efficient power conversion. It features robust construction, an optimized cooling system, and high-grade insulation for reliable performance.

Product Overview

High Efficiency Three Phase Induction Motor

The Yxn Series High Efficiency Three Phase Induction Motors are engineered for demanding industrial applications requiring reliable power conversion. Featuring a robust construction and an optimized cooling system, these motors deliver high performance with low noise and vibration levels. They are suitable for continuous duty and offer versatile mounting configurations for machinery such as pumps, fans, and compressors.

Technical Specifications

Efficiency Level

High Efficiency

Motor Type

Three Phase Induction Motor

Duty Cycle

Continuous Duty

Features

Key Features

- Robust construction
- Optimized cooling system
- High-grade insulation
- Low vibration levels
- Low noise levels

Application Compatibility

Suitable Applications

Pumps, Fans, Compressors, General-purpose machinery

Compliance

Standard Compliance

International Standards
