

High-Efficiency Vertical Radiator

This high-efficiency radiator is designed for optimal heat dissipation in residential or commercial spaces. Constructed with multiple vertical panels for increased surface area, it promotes rapid cooling and consistent temperatures.

Product Overview

High-Efficiency Vertical Radiator

This high-efficiency radiator is engineered for optimal heat dissipation in both residential and commercial spaces. Featuring multiple vertical panels, it maximizes surface area to promote rapid cooling and consistent temperature maintenance. Its compact design and durable finish offer a space-saving heating solution that enhances energy efficiency and comfort.

Technical Specifications

Suitable Environments

Residential • Commercial

Installation

Standard plumbing systems

Design Features

Vertical Panels, Compact Design, Durable Finish
